

Problem Statement :

- Building a Modern Version of SocialCalc.

Problem Statement Title:

- SocialCalc

Team Leader Name:

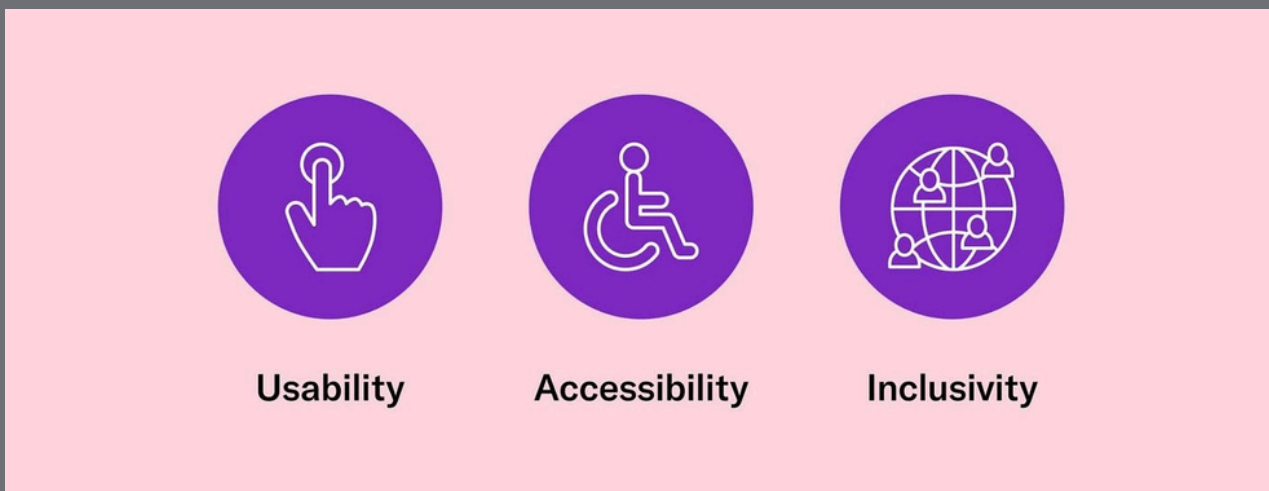

- Jai Bansal

Institute Name:

- Netaji Subhas University Of Technology

PROBLEM:

01

Absence of Collaboration:

Existing tools often lack integrated communication features, making it difficult for teams to collaborate efficiently on shared calculations.

02

Accessibility and Usability

Many current solutions are not fully accessible or user-friendly for all individuals.

03

Security and Privacy

Data security and user privacy are major concerns with current project making it prone to cyber-attack.

PROPOSED SOLUTION

REAL-TIME COLLABORATION

Enables multiple users to work together on calculations simultaneously, with live updates and seamless teamwork.

USER-FRIENDLY ACCESSIBILITY

Designed to be accessible for all users, including those with disabilities, ensuring broad usability.

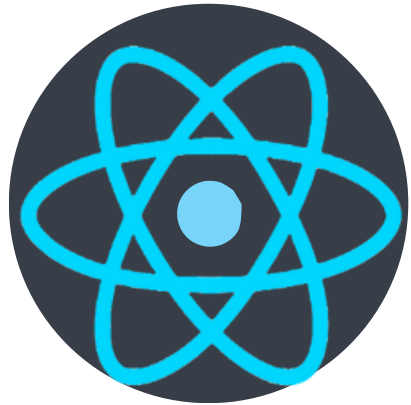

INTEGRATED COMMUNICATION

Includes chat and video call options within the tool, enhancing communication and collaboration without switching platforms.

CUSTOMIZABLE AND SCALABLE

Offers a flexible and scalable solution suitable for both individual users and larger teams, with options to expand functionality as needed.

BUSINESS MODEL

Freemium Model

Offer a free basic version with optional upgrades for premium features.

Subscription Plans

Provide tiered plans for businesses with varying features and user limits.

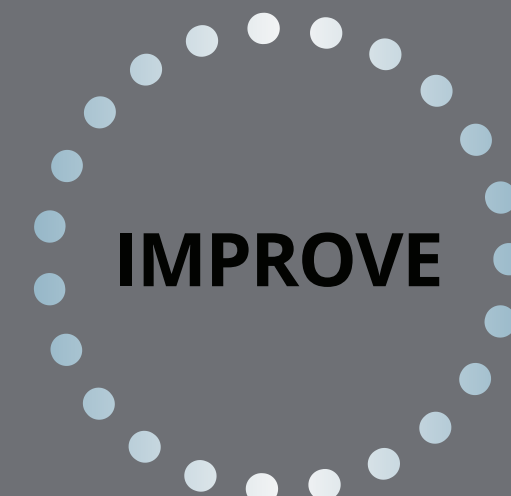

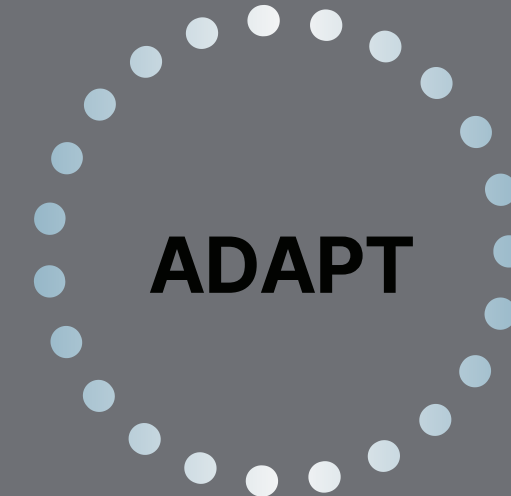

In-App Purchases

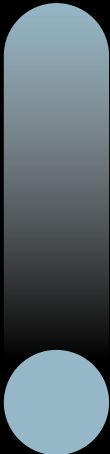

Sell additional features or tools within the app.

Advertising and Partnerships

Use ads and partner with complementary services for extra revenue.

01

Chat Option:

Users can communicate directly within the calculator, facilitating real-time discussions and collaboration.

02

Video Call Option:

Initiate video calls directly from the tool for face-to-face meetings and discussions..

04

User Accessibility:

Designed to be usable by everyone, including those with disabilities, through features like screen reader support.

05

Security and Privacy:

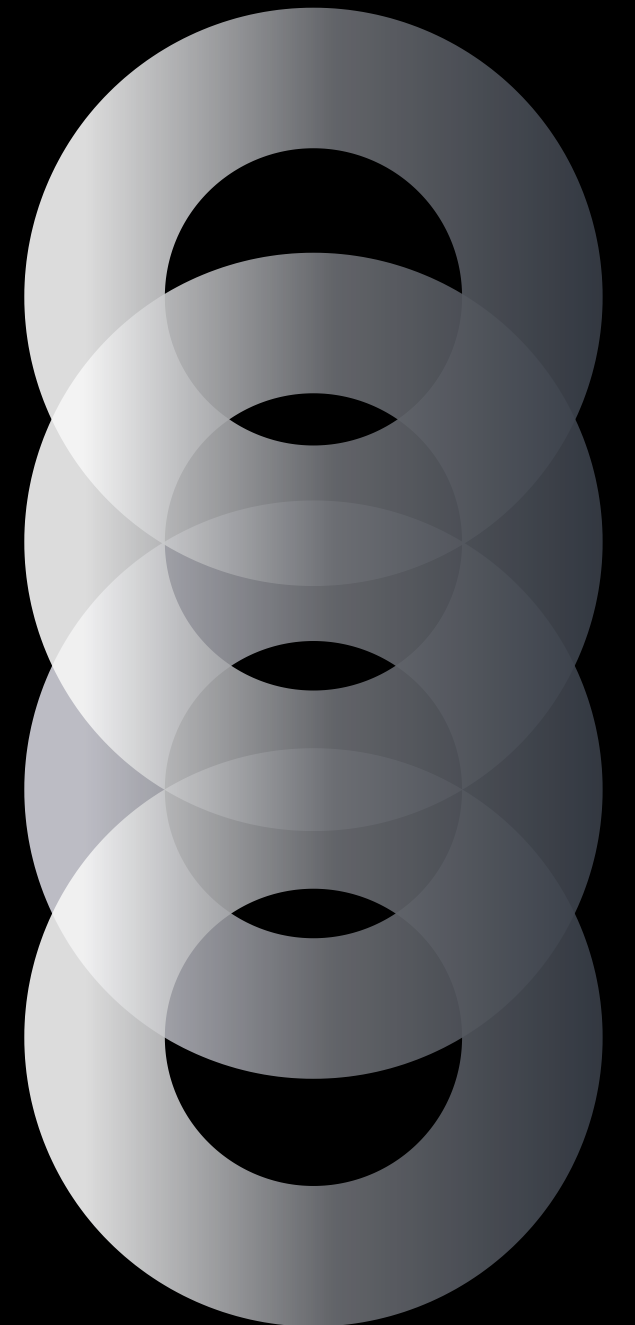

Secure user sign-in and data protection through Google's authentication system, ensuring privacy.

03

Multiple Users Can Contribute at Once:

Several users can work on the same document simultaneously, with real-time updates visible to all.

USP

SUMMARY

Enhanced Usability

Designed with an improved UI/UX and accessibility features, our tool ensures an intuitive and inclusive experience for all users.

Robust Security

Utilizes Google authentication for strong security and privacy, safeguarding sensitive data and ensuring secure user access.

Innovative Collaboration

The project integrates chat and video call features, allowing seamless real-time communication and teamwork within a single platform.

Sustainable Business Model

Implements a freemium model with subscription plans, in-app purchases, and partnership opportunities to generate revenue and support growth.
